

DECISION INTELLIGENCE ENGINE

Analytics Engineering + Decision Science

Dashboard 2 — Policy Benchmarking • Monte Carlo Evidence • Intervention ROI

BEST POLICY

Near-Critical

overall benchmark

COST DELTA

\$9.05M

vs traditional avg

SERVICE GAIN

+0.080 pp

vs traditional avg

SCENARIOS WON

5/5

cost benchmark

TOP ROI NODE

WAR_012

Warehouse

RUNS

3,750

Monte Carlo outputs

Policy Benchmark Matrix

Cost reduction vs traditional by scenario.

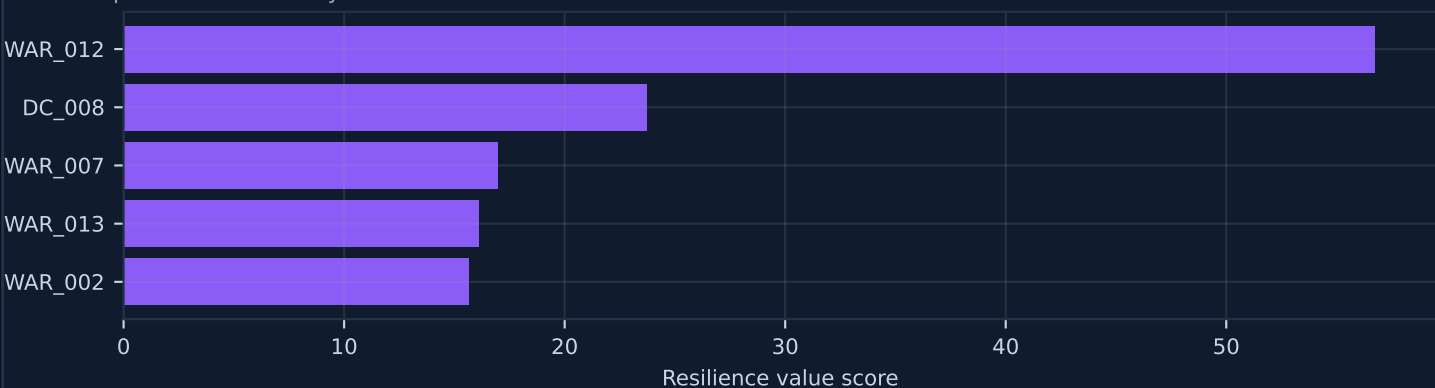

Monte Carlo Distribution

Run-level total cost distribution by policy.

Decision Ranking

Top nodes selected by resilience economics.

Decision Logic Decision pipeline

From data outputs to recommended actions.

- 1 Simulate scenarios**
Demand, lead-time and failure shocks
- 2 Benchmark policies**
No intervention vs traditional vs near-critical
- 3 Rank interventions**
Resilience value and cost efficiency
- 4 Recommend action**
Prioritize high-impact nodes
